

Five Senses

2021

Set of 5 handdrawn and digitally enhanced

animations, over 700 frames

Class Project

This was my attempt to capture the sensation of each of the five senses via five connected animations totaling to approximately a minute duration. Each sense is visually distinct and uses imagery related to the respective sense to communicate the idea.

Sight and hearing are both slightly larger, and include color due to their more powerful sensory roles. Hearing is also the only one to include audio (composed by my friend Niland Sebenaler) for obvious reasons.
